Big Idea/ Topic

These digital plans have been designed by Georgia educators as examples of what’s working well for their students. When making curriculum decisions for your students, consult the guidelines of your local school and district.

Teaching Others What We Know: Informational Writing

This 10-lesson mini unit introduces students to the concept of becoming writers of informational texts. While this unit focuses primarily on writing instruction, the assumption is that students are also engaging in reading workshop lessons centered around nonfiction texts. This overlap in reading and writing instruction allows students to begin producing the same types of texts they are reading independently and invites natural observations of text characteristics used by readers and writers of informational texts. In this unit students will observe as the teacher models writing informational booklets and students will produce multiple booklets themselves over the course of the ten days.

Lesson Two: Telling Facts and Adding More

Students will continue to add to the booklets they started in lesson one, with an emphasis on adding details to both pictures and text. The teacher will continue to clarify for students that informational books tell facts about a topic rather than telling a story about a time something happened. The teacher will model continuing his/her booklet rather than starting a new one.

NOTE: This learning plan uses specific texts (e.g., written, performed, illustrated) as concrete examples of standards-based learning activities. These texts are not endorsements. The selection of classroom texts is completely a local decision and subject to local approval processes.
<table>
<thead>
<tr>
<th>Learning Targets</th>
<th>Lesson “Small Make(s)”</th>
<th>Unit “Big Make”</th>
</tr>
</thead>
<tbody>
<tr>
<td>I can <strong>describe</strong> the purpose of informational texts.</td>
<td>Continue to create a booklet of informational writing about a single topic. Students will add details to the pictures and words in the book started in lesson one.</td>
<td>Students will individually publish an informational booklet that teaches others by choosing one of the booklets they created during the unit, revising and editing to the best extent possible, then sharing with an authentic audience, such as a Buddy Kindergarten class or another first-grade class.</td>
</tr>

---

### Standard Alignment

**ELAGSE1W2**: Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.

**ELAGSE1W5**: With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed. a. May include oral or written prewriting (graphic organizers).

**WIDA English Language Development Standards for English learners (ELs)**:

Teachers of ELs are encouraged to use the resources in the [WIDA English Language Development Standards Framework, 2020 Edition](https://www.wida.us/standards-framework) to design language expectations (p.28) specific to the GSE. Examples of the English language needed to support informational writing can be found on p. 69.
Instructional Design

For more information regarding daily routine practices and/or additional information on the unit framework (including materials), please see the Unit Plan Overview.

Various evidence-based practices (EBPs) are identified throughout the lesson below; however, we believe good teaching can be eclectic, “...thoughtfully, intentionally taking some of the best of different teaching methodologies, while always holding onto some research-based, core beliefs, we can help our students flourish in ways that teaching only one way will not” (Roberts, 2018, p. 6). Always feel free to adapt the lesson to meet your professional needs with your specific student population. Ideas for student supports and enrichments can be found in the “Student Learning Supports” section.

This mini unit is written for synchronous distance learning or face-to-face learning that utilizes various technology resources. Everything listed as synchronous can be utilized with little to no change in a face-to-face (f2f) environment. However, guidance is provided for modifications, including ideas for supporting students who are learning asynchronously and those with little or no access to technology (unplugged/offline).

Materials

Teacher—virtual whiteboard (shared document), document camera, teacher’s booklet begun in previous lesson, sample student mentor text [link to student sample booklet]

Students—blank paper, unplugged handout version [link to lesson 2 handout unplugged]

Engage

Opening:

Synchronous

- Place student writing sample from yesterday (“All About Eagles”) [link to student sample booklet] underneath the document camera and ask students if they think this writer was able to complete the entire book in one day. Guide them towards concluding that a great deal of work went into writing and drawing the text, and the author likely worked on it for more than one day, taking their time to add details and as much information as they could. [EBP: Create an engaged community of writers [Minimal evidence] (Graham et al., 2016).
• Place the booklet you began yesterday underneath the document camera and think aloud about the fact that what you wrote yesterday is not enough – you have more to say. Write 1-2 additional facts on the next page, being sure to add details to your drawing to align with your text (e.g., if you wrote “Sharks eat seals” don’t just draw a shark, but also draw the seal, the sharp teeth, the waves on the surface of the water).

Asynchronous
Post on your learning management platform a brief video of yourself a) discussing how the author of “All About Eagles” likely spent more than one day writing their book, and b) modeling adding 1-2 additional facts to your booklet from yesterday.

Unplugged/Offline
Have students work through part 1 of Lesson 2 Handout – unplugged.

Explore
Synchronous
• Allow students to actively participate in helping you write additional facts. The emphasis here is on taking our time with our booklets, adding details, and not just quickly writing one sentence per page and thinking we’re done. [EBP: Provide daily time for students to write [Minimal evidence]; EBP: Teach students to use the writing process for a variety of purposes. [Strong evidence] (Graham et al., 2016).

• During this segment, emphasize the inclusion of facts rather than stories in our writing. You might ask, “Can I tell about the time I saw a shark when I went to the beach? No! This is informational writing, not story writing, so we are teaching our reader facts about our topic.”

Asynchronous
Ask students to help you with your modeled piece of writing – what additional facts could you add? Have students record a brief Flipgrid or Seesaw video telling you 1-2 sentences you could add to your booklet.

Unplugged/Offline
Have students work through part 2 of Lesson 2 Handout – unplugged.
Apply
Synchronous/Asynchronous/ Unplugged/Offline

- Students will work independently to add to the booklets they started yesterday. [EBP: Provide daily time for students to write [Minimal evidence]; EBP: Teach students to use the writing process for a variety of purposes. [Strong evidence] (Graham et al., 2016).
- For many young writers, drawing serves as an effective prewriting activity, so encourage students who “don’t know what else to write” to draw a picture of their topic with as much detail as they can. While all students should be including drawings in their booklets, detailed illustrations can be particularly supportive in helping students add more information to their texts.

Reflect
Synchronous
Students can share their writing in groups of 2-3 via breakout rooms. Ask students to listen for the facts the writer is teaching about the topic. Once the group has returned to a whole-group format, the teacher might ask 1-2 students to share how they added details to their writing from yesterday. What information did they add, and how well do details match the picture? [EBP: Create an engaged community of writers [Minimal evidence] (Graham et al., 2016).

Asynchronous/ Unplugged/Offline
Students will continue working on their booklets. These can be shared with teachers via a scheduled online conference, regular phone conference during which the student reads aloud their writing, or photos can be emailed to the teacher of the student’s work.

Evidence of Student Success
Students will be considered successful if they are able to effectively participate in the discussion about adding details to informational text. They should be able to add additional sentences to the booklet they started yesterday. Their booklets should contain factual information and not narratives or opinions.

Formative Assessment
“More of What’s Meaningful”: Formative Assessments (Serravallo, 2013)
Formative assessment can occur in two ways:
• Conferring [Guidance: Tips for Conferring to Maximize Student Engage]
  o “Supercharge your Conferring: Focus on Goals, Strategies, and Feedback” (Serravallo, 2018)
• Sharing ["How to Create an Inclusive Virtual Classroom” (Kern, 2020)]
  o “8 Strategies to Improve Participation in Your Virtual Classroom” (Minero, 2020)

---

**Student Learning Supports**

At all levels, the English Language Arts standards encourage students to become critical thinkers and communicators. The following strategies, though not exhaustive, are designed to support students struggling to meet this lesson’s learning target, and/or learning English as an additional language, and/or are exceeding and would benefit from enrichment.

**Supports/Scaffolding:**

- **Conceptual Processing:** Allow additional processing time. Review this content prior to the lesson occurring so that the student will have additional time to formulate responses. Summarize each lesson segment and keep summary accessible for students. Implement scaffolds identified below for various circumstances.
- **Language:** Prior to beginning of the lesson, explicitly teach vocabulary required to engage with the content. [EBP: Teach students academic language skills, including the use of inferential and narrative language, and vocabulary knowledge [Minimal evidence] (Foorman et al., 2016)].
- **Visual-spatial Processing:** Provide opportunities for students to engage with visual representations and/or manipulatives (virtual or concrete) as they explore informational writing and communicate ideas.
- **Organization:** Maintain logical progression of big ideas/lesson segments in the course’s shared virtual space so that students can revisit lesson segments as necessary. Help students bookmark frequently utilized sites (such as Flipgrid) or how to group tabs in Chrome to assist with organization.
- **Memory:** Maintain logical progression of big ideas/lesson segments in the course’s shared virtual space so that students can revisit lesson segments, as necessary.

**Lesson-specific Scaffolds:**

Some students may have difficulty distilling the thoughts in their head down to a manageable sentence to put on paper. In these instances, encourage students to begin with a detailed picture with labels, similar to page two of the sample text “All About Eagles.” Then confer with the student and help them compose a sentence about one of the labels. It may help to have the student “say the sentence across their fingers” by touching
one finger for each word they say. Have them repeat the sentence 2-3 times while touching their fingers, then return to the first finger to determine the first word to write. Using this tactile approach can help young writers organize their thoughts in concrete ways.

**Supports for English learners:**

- Suggestions for this lesson include but are not limited to: providing students with sentence frames to add facts to writing, providing students with labeled diagrams/pictures to assist in utilizing topic-related English vocabulary words, strategically grouping students to allow for peer modeling of language, etc.
- Educators may find it valuable to review WIDA’s Proficiency Level Descriptors (pp. 80-81) when planning for differentiation based on students’ levels of English proficiency.
- Teachers of ELs are encouraged to incorporate high leverage practices for teaching EL students and to utilize relevant evidence-based strategies such as those found in Project EXCELL’s downloadable [GO TO Strategies](#) (Levine et al., 2013).

**Acceleration/Extension**

**Standard:**

**ELAGSE1W5:** With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed. a. May include oral or written prewriting (graphic organizers).

**Acceleration/Extension Activity:**

Students who need acceleration can be encouraged to write multiple sentences per page and add additional pages to their booklets. You might have them read an online informational text from a source such as [www.epic.com](http://www.epic.com) to serve as a mentor text beyond the sample student text included in this lesson. Students might observe the ways the writer addresses the reader to create a sense of “voice” in the writing, as well as the depth of facts included.
Engaging Families

Aligning with your district’s family engagement plan to facilitate the most meaningful way to work with your families.

- Families can support students as they begin to create informational booklets by serving as genuinely interested readers/listeners as well as by asking questions to stimulate further writing (e.g., What kinds of activities can you do at Myrtle Beach?).
- Engage families of English learners and encourage students to share their work aloud at home. Families can also read bilingual books on students’ chosen topics to identify/support the English language needed for the unit (sample online resources for free bilingual books: Unite for Literacy, Global Storybooks).
